Interests

Profile

I am a Graphic Design student with over four years of experience in 3D modeling using Blender. I specialize in game assets, product visualization, and scene design, creating original 3D models for freelance projects with both local and international clients. I am also continuously improving my skills in illustration and typography.

Education

Selcuk University

Graphic

2023 – Expected Graduation: 2027

Open Education High School

High School Diploma

2023

Experience

3D Artist / Graphic Designer

2021 – Present

Freelance

I developed 3D models for local and international clients using Blender. My work includes low poly and high poly modeling, product visualization, scene design, and optimized assets for game and advertising projects.

Graphic Design Intern

July 2025

RETACO (Ankara)

I worked as a Graphic Design Intern at RETACO, where I created visual materials using Adobe software, supported the design team in various projects, and gained hands-on experience in professional design workflows within an office environment.
